PROFESSIONAL SUMMARY

MCA student with a strong foundation in Python, Java, software development, and computer science fundamentals. Experienced in building practical applications using Python, Flask, SQL, and AI/LLM technologies. Interested in AI-native software engineering, Generative AI, web technologies, and developing solutions for real-world problems.

EDUCATION

Master of Computer Applications(MCA), Gandhi Institute of Technology and Management	2025 - Present
Bachelor of Computer Applications(BCA), JNRM	2022 - 2025
12 th CBSE, Andaman and Nicobar Islands	2020 - 2021
10 th CBSE, Andaman and Nicobar Islands	2018 - 2019

SKILLS

- **Programming:** Python, C, C++, Java
- **Web Technologies:** HTML, CSS, JavaScript, Flask, Jinja
- **AI & LLM:** Generative AI, Large Language Models (LLMs), Prompt Engineering, Groq API
- **Libraries & Frameworks:** OpenCV, face_recognition, Flask-SQLAlchemy, Flask-Login
- **Databases:** SQLite, Firebase Realtime Database
- **Tools:** Git, GitHub, VS Code, python-dotenv
- **Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS, Cloud Fundamentals
- **Software Practices:** SDLC, STLC, Testing & Debugging
- **Soft Skills:** Problem Solving, Communication, Team Collaboration

PROJECTS

AI-Powered Bug Tracking and Issue Management System

- Technologies: Python | Flask | SQLAlchemy | SQLite | JavaScript | Jinja | Groq API | LLM
- Developed an AI-powered bug tracking and issue management system using Python and Flask.
- Integrated an LLM through the Groq API to analyze submitted code and assist with identifying programming bugs.
- Implemented user authentication, bug management, and database operations using Flask-Login and SQLAlchemy.
- Built functionality to analyze code, generate AI-assisted insights, and manage identified bugs through a web interface.
- Used SQLite for persistent storage of users, bugs, and application data.

Face Recognition Attendance System

- Technologies: Python | Flask | OpenCV | face_recognition | Firebase | HTML | CSS
- Developed an AI-based attendance management system using Python, Flask, OpenCV, and face_recognition.
- Implemented real-time face detection and recognition, marking attendance in approximately 5 seconds.
- Tested the system with approximately 30 students and 50–60 attendance records.
- Integrated Firebase Realtime Database for storing student details and attendance records.
- Implemented student registration by capturing and encoding facial images for future recognition.
- Designed a responsive web interface using HTML and CSS for student registration and attendance management.

CPU Scheduling System | C++

- Technologies: C++ | Data Structures | Operating Systems
- Developed a menu-driven CPU Scheduling System in C++ to simulate process scheduling and management.
- Implemented FCFS, SJF, Priority Scheduling, and Round Robin scheduling algorithms.
- Applied Arrays, Stacks, and Linked Lists for process storage, undo functionality, and dynamic process management.

- Implemented searching and sorting algorithms to efficiently manage process information.
- Developed functionality for adding, deleting, searching, displaying, and scheduling processes.

Inventory Management System

- Technologies: Python | JSON | File Handling
- Developed a menu-driven Inventory Management System using Python to manage product inventory.
- Implemented CRUD operations to add, view, search, update, and delete product records.
- Managed stock levels, product sales, low-stock alerts, and inventory value calculations.
- Used JSON file handling to store and automatically load product information.
- Applied Python concepts including functions, dictionaries, loops, conditional statements, and exception handling.

EXPERIENCE

Government E-Procurement Executive | Dolphin Agency, Sri Vijaya Puram

Feb 2024 – Apr 2025

- Managed GeM and Defence e-procurement portals for government procurement activities.
- Prepared bids, compliance documents, and quotations according to tender requirements.
- Coordinated technical documentation and procurement workflows for bid submissions.
- Reviewed tender requirements and organized the necessary documentation for compliance.
- Coordinated with relevant stakeholders to complete technical and procurement documentation.

CERTIFICATIONS

Generative AI with LLMs | SkillDzire | APSCHE | AICTE

May 2026 – Jun 2026

- Completed a short-term internship focused on Generative AI and Large Language Models (LLMs).
- Learned LLM fundamentals, prompt engineering, AI applications, and generative AI concepts.
- Gained hands-on exposure to modern AI tools and practical use cases.
