PROFESSIONAL SUMMARY

MCA student with a strong foundation in Python, Java, software development, and computer science fundamentals. Experienced in building practical applications and interested in AI-native software engineering, web technologies, and solving real-world problems.

EDUCATION

Master of Computer Applications(MCA), Gandhi Institute of Technology and Management	2025 - Present
Bachelor of Computer Applications(BCA), JNRM	2022 - 2025
12 th CBSE, Andaman and Nicobar Islands	2020 - 2021
10 th CBSE, Andaman and Nicobar Islands	2018 - 2019

SKILLS

- **Programming:** Python, C, C++, Java
- **Web Technologies:** HTML, CSS, Flask
- **Libraries:** OpenCV, face_recognition
- **Database & Tools:** Firebase , Git , GitHub , VS Code
- **Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS, Cloud fundamentals
- **Soft Skills:** Problem Solving, Communication, Team Collaboration.
- **Software Practices:** SDLC, STLC

PROJECTS

Face Recognition Attendance System

- Technologies: Python | Flask | OpenCV | face_recognition | Firebase | HTML | CSS
- Developed an AI-based attendance management system using Python, Flask, OpenCV, and face_recognition for automated face recognition.
- Implemented real-time face detection and recognition to mark attendance accurately using a webcam.
- Integrated Firebase Realtime Database to securely store student details and attendance records.
- Designed a responsive web interface using HTML, CSS for easy interaction.
- Implemented student registration by capturing and encoding facial images for future recognition.
- Improved application reliability through testing, debugging, and error handling.

CPU Scheduling System | C++

- Technologies: C++ | Data Structures | Operating Systems
- Developed a menu-driven CPU Scheduling System in C++ to simulate process management.
- Implemented CPU scheduling algorithms including First Come First Serve (FCFS), Shortest Job First (SJF), Priority Scheduling, and Round Robin.
- Used Arrays for process storage, Stacks for undo functionality, Linked Lists for dynamic process management.
- Implemented searching and sorting algorithms to efficiently manage and schedule processes.
- Designed a console-based interface for adding, deleting, searching, displaying, and scheduling processes.

Portfolio Website

- Technologies: HTML | CSS
- Developed a responsive personal portfolio website.
- Optimized UI and cross-device compatibility.
- Focused on clean UI design and intuitive navigation to provide a seamless user experience.

Console To-Do List Application

- Technologies: Python | JSON | File Handling
- Developed a menu-driven command-line To-Do List application using Python.
- Implemented features to add, view, update, mark as completed, and delete tasks.
- Used JSON file handling to store tasks and automatically load them when the application starts.
- Applied Python concepts such as functions, loops, conditional statements, lists, dictionaries, and exception handling.
- Designed a simple and user-friendly interface for efficient task management.

Inventory Management System

- Technologies: Python | JSON | File Handling
- Developed a menu-driven Inventory Management System using Python to manage product inventory efficiently.
- Implemented CRUD operations to add, view, search, update, and delete product records.
- Managed stock levels, product sales, low-stock alerts, and inventory value calculation.
- Used JSON file handling to store product information and automatically load data when the application starts.
- Applied Python concepts such as functions, dictionaries, loops, conditional statements, and exception handling to build a reliable console application.

EXPERIENCE

Dolphin Agency ,Sri Vijaya Puram

02/2024-04/2025

- Government E-Procurement Executive
- Managed GeM and Defence e-procurement portals
- Prepared bids, compliance documents, and quotations
- Coordinated technical documentation and workflows

CERTIFICATIONS

Generative AI with LLMs , SkillDzire | APSCHE | AICTE

05/2026 – 06/2026

- Completed a short-term internship focused on Generative AI and Large Language Models (LLMs).
- Learned the fundamentals of LLMs, prompt engineering, AI applications, and generative AI concepts.
- Gained hands-on exposure to modern AI tools and practical use cases.
